I scuff my way over dull brown tiles
Down along the musky hallway.
Old brown doors, each with a memory:
A face, a group of faces, blurred and wasted
Sun streams through dusty panes
Scarred, battle-worn desks
Chalk dust on my sweater.
The faces are the same.
They sit at our desks
Clatter up old iron stairways
Yawn our yawns.
For them, time is now,
My time is not their time
I cannot bridge the chasm.
Time has run out
Though the double doors
Dawn along the musky hallway
And left me small, and old
Beneath the dust streaked windows.

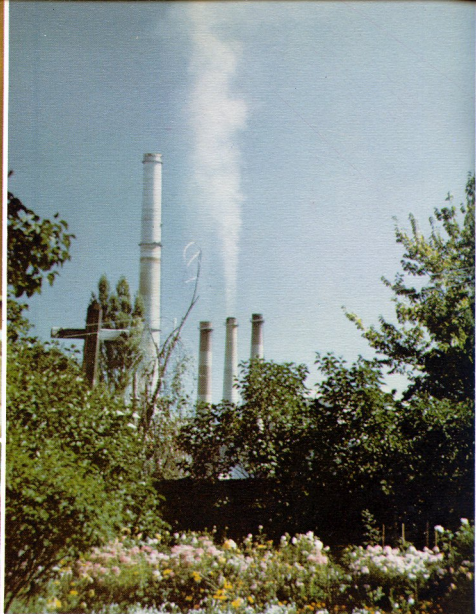

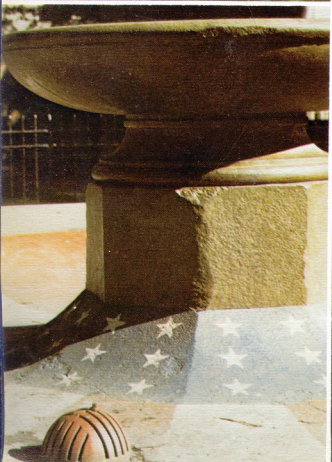

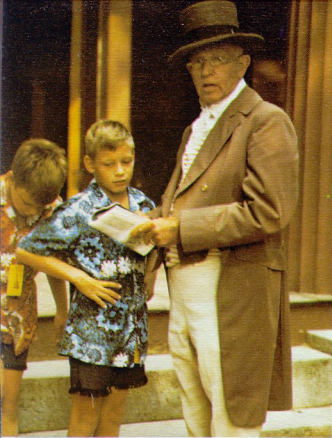

Ronald Roersch

Photo Essay (guys and dolls)	177
50th Anniversary	182

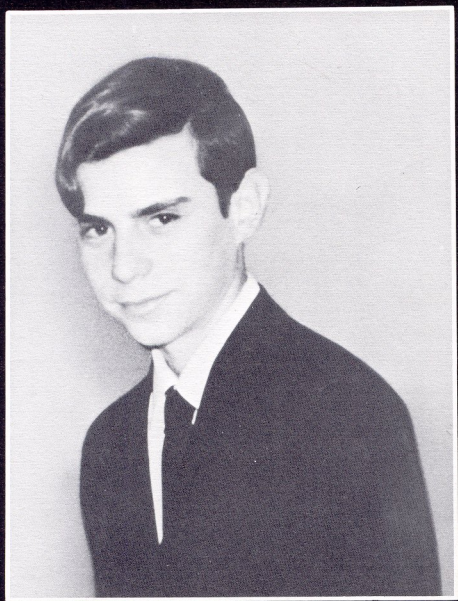

All students who enter Tech have their own individual hopes and ambitions. The hopes and ambitions of one of our fellow students came to an abrupt end last year. In February of last year, Stanley Wolpert died of a form of arthritis, periarthritis.

The passing of time taught us to accept the tragedy of his death, but we can never accept the far greater tragedy of his dying before he had a chance to develop to his full potential.

He was a member of the service squad and an outstanding student. This is indicative that he possessed those qualities so lacking, yet so needed in today's world.

As death knows no partiality, Stanley's passing brought everyone in the school closer together. Black and White, Jew and Gentile, Liberal and Conservative all came to mourn our common loss.

It is with these ideas in mind that we dedicate our yearbook to the memory of Stanley Wolpert.

June, 1972

To the Class of 1972:

You have enjoyed the distinction of spending your senior year at Brooklyn Technical High School during our school's Golden Jubilee Year. I congratulate you upon the successful completion of your student days and your graduation into the ranks of distinguished alumni that serve the world community in a variety of gratifying ways.

Many institutions have ceased to exist during the last fifty years while Tech has not only survived, but it still rates as one of the outstanding technical secondary schools in the country. This is due in large measure to its ability to change to meet new conditions and challenges in a rapidly changing society. Our curriculum, faculty, administration, physical plant, and instructional materials and methods are constantly being adapted to provide the best possible education and training to our selected, talented students.

I sincerely hope that you will meet with great success the challenges ahead, whether you are in college or in industry. We have provided you with basic knowledge, understanding, and technical skills. These must be fortified with creativity and humanity, if you are to be respected by your family and society.

Best wishes for happiness, professional fulfillment, and peace.

Very sincerely,
Louis Weiss

Service Squad

GENERAL ORDERS For All Members of the Service Squad

1. Personal cleanliness and neatness are required of all members of the S.O.S. at all times. During their tour of duty, the officers will inspect their men for these qualities.
2. A member of the S.O.S. should consider himself on duty at all times. Whether on post or off, he should always be striving to help in maintaining the high standards of Tech.
3. While on post all members must be alert, polite, and have a thorough knowledge of the orders for his particular post.
4. Members must report to their post as promptly as possible.
5. Members shall not leave their post until properly relieved.
6. Your badge does not entitle you to unusual privileges.
7. Your badge does not entitle you to leave a class without the teacher's permission. Members of the squad may leave a subject class early or arrive late with the permission of the subject teacher. In such cases there must be a *Late or Early privilege* stamped on the back of the membership card by the faculty adviser of the Service Squad.
8. Your badge gives you authority in assisting with the enforcement of the rules of governing the students. Your duties must be carried out in a forceful but courteous manner and without any display of arrogance on your part.

SMOKE PATROLS — There are four smoke patrols, one on each corner of the school block. One first lieutenant is in charge of each smoke patrol. Assigned to him are several second lieutenants who have lunchroom or door squads. It is the duty of these smoke patrols to stop students from smoking on the school block. Each corner has its own separate boundary lines.

This booklet is dedicated to the Officers and the Squadmen who have made the Service Squad one of the finest organizations at Brooklyn Technical High School.

Safety Order Service

Service Squad Handbook

**BROOKLYN TECHNICAL
HIGH SCHOOL**

For Mr. O.

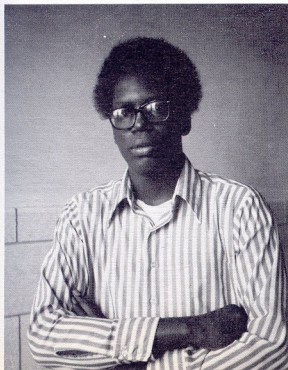

Life,
Now is within the reach of us all,
Grab it.
Realize what it means,
before it is lost.
Make mistakes, but learn.
Imitate others, but stay individual.
Take a slow walk, In the stand
Gaze up into the stars, And smile.
Do the most with what you have.
Success will come,
to those,
Who know themselves.

Good Luck

DAVID DIMASSIMO

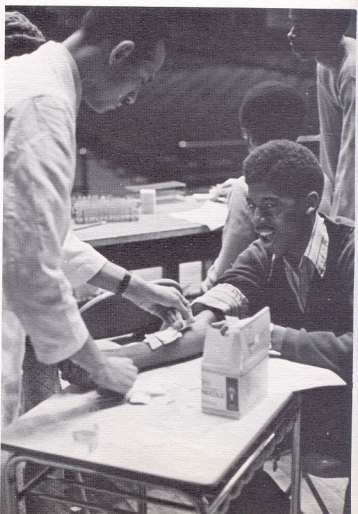

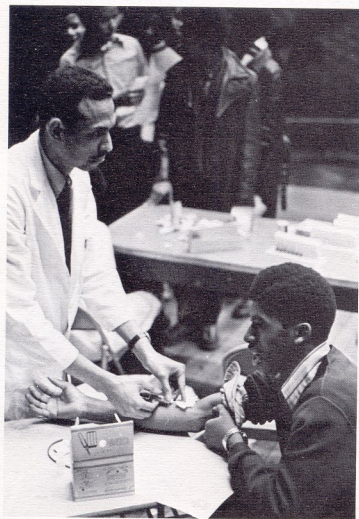

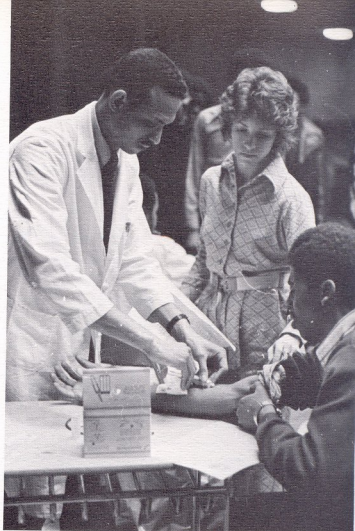

ALFRED SHEPPARD

PIONEERS, OH, PIONEERS

Although last year only two co-eds broke the sex barrier to gain admission to Tech, this year over 200 stormed through the breach opened by their two intrepid predecessors Diane Cooperman and Helen O'Rourke. Tech's rigorous program has not been water down. Everywhere the young women can be seen in slacks, dresses or overhauls learning those trades and skills once thought the private domain of man.

Sickle cell anemia is a disease of genetic origin, one that in its most severe form can cause death. In 1972, Brooklyn Tech exploited the skills of its generous neighbor. The Brooklyn Hospital by conducting a campaign to minimize the effect of the insidious disease through detection and education.

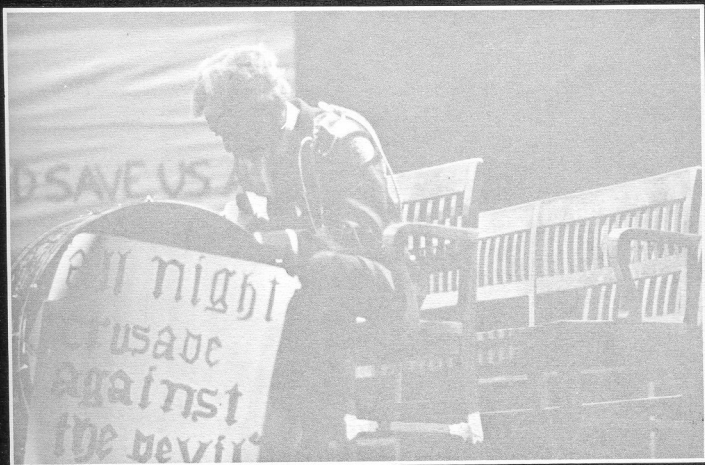

To commemorate its golden anniversary, B.T.H.S. produced its first musical extravaganza, "Guys and Dolls." On this and following pages, staff photographer Fung Lam captures the mood of these memorable performances.

HOT BOX

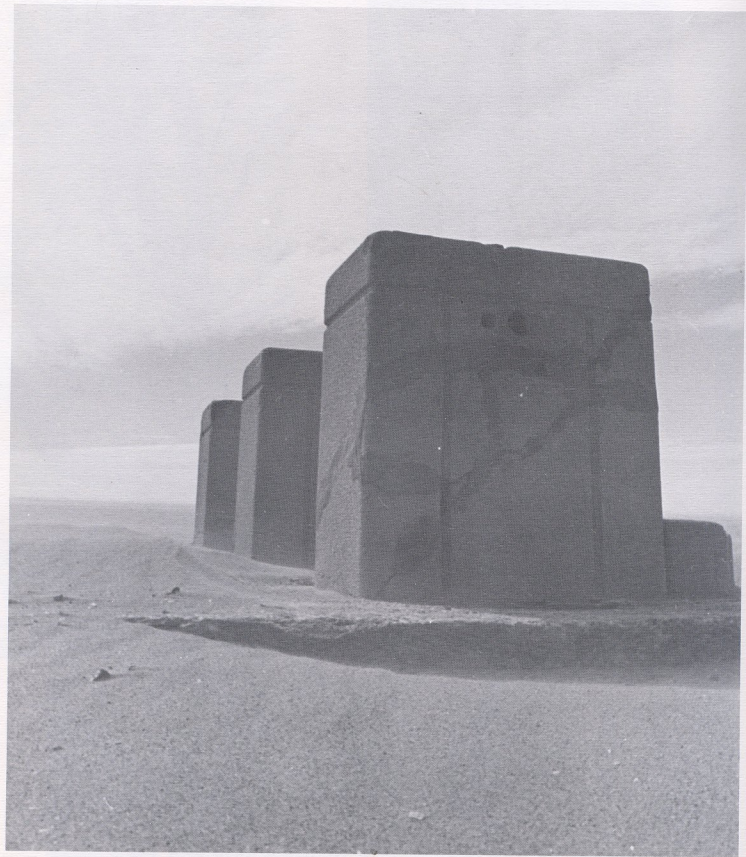

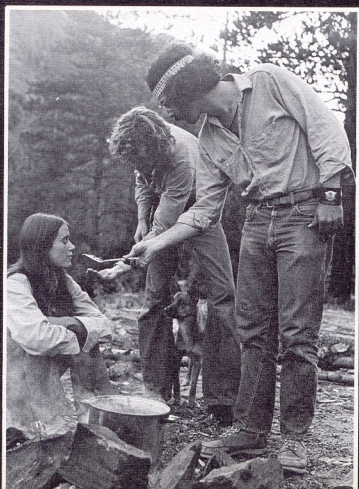

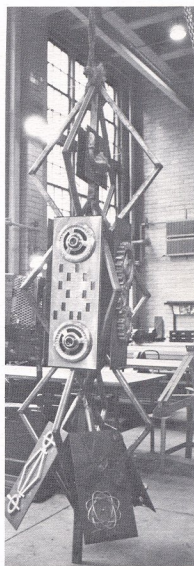

Ambitious Art Project Honors Tech's Golden Anniversary

A black tower of steel, aluminum and concrete was designed and built by Brooklyn Technical HS students in honor of the school's Golden Anniversary.

The tower, 12 feet high and weighing 5,000 pounds, is one of the more ambitious art projects ever completed by a high school. Under the supervision of teachers from the art, structural, mechanical and pattern-making departments, more than one dozen students collaborated on the design and construction. In most cases the students built those parts of the sculpture that they designed, utilizing the many facilities within the school.

There are 10 steel and aluminum plaques of abstract design, depicting the various curricula

taught in the school, connected to a tower made of three stainless steel tubes. The idea was to build a monument to convey the spirit of "Tech," as the school is often referred to, and to demonstrate that the school has the means available to execute such an idea.

Classes in the industrial design and structural departments held competitions for the best designs of the tower and plaques. Those students submitting the best designs were given the opportunity to construct them in the school's shops.

Brooklyn Technical HS was founded 50 years ago as an advanced high school with the very latest technical equipment so as to meet the country's growing technology. The school

has since rebuilt many of its laboratories and shops with the latest equipment, so that its facilities have kept abreast of the advancing technology.

About 40,000 students have been graduated since its founding.

Originally the school was designed to supply industry directly with highly competent high school graduates and at the same time to provide colleges with more advanced students. Because of the growing complexity in technical fields, and the demand for higher education, the school now sends about 95 per cent of its graduates on to higher education in colleges and universities. Courses have maintained their basic technical competence so that a present graduate can also enter industry and compete favorably with those students graduating from a two-year community college course in some technical area.

Despite a larger body state economies foreclosures in staff and elim of after-school advanced e several electives, and all b several courses, a school said. Formerly an all-boys' school year it admitted 250 girls its 1,300 freshmen.

A Fund Drive

"We've got varsity athletes their fans out peddling c from door to door to money for equipment and portation." Lepelletier said hope we can get people to to our show to see what a school we have, but the real pose is to get the people to the effects of all these state cuts in the budget. "The future of our school," th

Students Build Tower For Tech Anniversary

Students at Brooklyn Technical High School, 29 Fort Greene Place, designed and built a big black tower of steel, aluminum and concrete in the school's inside courtyard to help commemorate the school's 50th anniversary this year.

One of the most ambitious art projects ever completed by a high school, the tower is 12 feet high and weighs 5,000 pounds.

"More than a dozen students, under supervision of teachers from the art, structural, mechanical and pattern-making departments, collaborated on the design and construction," said a school spokesman.

Abstract Design

"In most cases, the students built the parts of the sculpture they designed, using the school's facilities. 'There are 10 steel and aluminum plaques of abstract design, depicting the various curriculum taught at Tech, connected to a tower made of stainless steel tubing,' said the spokesman, adding:

"The idea was to build a monument to convey the spirit of 'Tech,' as the school often is referred to, and to demonstrate the school has the means available to execute such an idea."

Classes in the industrial design and structural departments held competitions for the best designs for the tower and plaques. Students who submitted the best designs, as decided by their teachers, were given an opportunity to construct them in the school's various shops.

Worked From Models

"The tubing of the tower was arc-welded together in the structural shop," said the spokesman.

"Wooden models of the plaques first were made in the pattern-making shops. Later, casts in aluminum were made in the school's foundry. The castings were machined in the mechanical shops, and assembled by welds and bolts to the tower."

Represented on the plaques, other than the regular liberal

arts courses, are the aeronautical, architectural, chemical, electrical, electronics, industrial design, mechanical and structural programs of the school.

Brooklyn Technical HS, one of the four specialized high schools in New York City having special entrance requirements, offers students an opportunity to explore technical fields on a secondary school and an advanced placement level.

By using the many modern facilities in the school building in downtown Brooklyn, learning is accomplished by means of projects utilizing theory and technical shop work, according to the spokesman.

Founded in 1921

The school has approximately 6,000 students, and about 49,000 students have been graduated since its founding.

"Brooklyn Tech was founded 50 years ago as an advanced high school, with the very latest technical equipment, so as to meet the country's growing technology," the spokesman said.

"The school has since rebuilt many of its laboratories and shops with the latest equipment, so that its facilities have kept abreast of the advancing technology."

"Originally, the school was designed to supply industry directly with highly competent high school graduates, and at the same time to provide colleges with more advanced students."

95% Continue

"Because of the growing complexity in technical fields, and the demand for higher education, the school now sends about 95% of its graduates on to higher education in colleges and universities."

"Courses have maintained their basic technical competence, so that a present graduate also can enter industry and compete favorably with those students graduating from a two-year community college course, in some technical area."

Brooklyn Tech also fills other needs for industry by teaching engineering applications no longer taught in the technical colleges, according to the spokesman.

'Guys & Dolls' Help Brooklyn Technical Light 50 Candles

In celebration of the 50th anniversary of the founding of Brooklyn Technical High School, the student body and faculty of the school produced a revival of "Guys and Dolls" on Friday, December 17, and on Saturday, December 18.

This is only one of the several events that will be held throughout the Jubilee Year. The Parent-Teachers Association of the school under Mr. Peter Cassi, President, is cooperating in promoting this activity.

The music was played by the school orchestra. There were about 150 students involved in the production of which 50 were in the cast. There were two faculty members in the cast and in the orchestra.

Brooklyn Technical High School has graduated about 49,000 graduates since its founding. Many are in engineering, academic and civic positions today. It is one of the specialized schools in the New York City school system for which entering students take examinations and both technical and academic subjects are taught to a student body of 6,000 of whom 250 are girls.

THE WORLD OF 1922

The World Of 1922

1922 saw prohibition in its prime. In Red Hook, Brooklyn, 12 people died of drinking whiskey made from wood alcohol ... Chief Justice Taft officiated at the dedication of the Lincoln Memorial before an audience of 100,000 people ... Archaeologists discovered the tomb of Tutankhamen (King Tut), called by newspapers, "the greatest archaeological find of all time" ... Fascism began in Italy as King Emmanuel called in Benito Mussolini to form a new cabinet ... Work was begun on the construction of the Holland Tunnel ...

The Supreme Court ruled Japanese to be ineligible for U.S. citizenship ... Radio was but an infant in 1922. Receiving sets of crystalheadphone types were selling rapidly. News, Sunday sermons, and daily music programs were fast becoming a part of many homes. Network broadcasting began that same year when the Princeton-Chicago game was broadcast in Chicago and New York City ...

1922 was also a great year for advancement in aviation. De La Cierua built a single-rotored autogiro, the first practical helicopter, and flew it 200 yards. It later flew 2½ miles. The surplus of flyers returning from World War I created the "Barnstorming era." Stunt flyers, air taxis, and general airline services were prevalent all over the country.

Without television and little radio present, people would read as their main form of entertainment in 1922. The most famous novel of 1922 was *Babbitt*, written by Sinclair Lewis. In *Babbitt*, Lewis attacked accepted middle-class values and assumptions.

The 1922 theatres presented, among plays of little note, such

COURTESY: MUSEUM OF THE CITY OF NEW YORK

"There has been a change for the worse during the past year in feminine dress, dancing, manners, and general moral standards. The causes are the lack of an adequate sense of responsibility in the parents of guardians of girls, a decline in personal religion, a failure to realize the serious ethical consequences of immodesty in girls' dress, a dulling of moral susceptibilities, an inability to grasp the significance of the higher things in human life, and last, but not least, the absence of sufficient courage and determination to resist the dictates of what is known as fashion when these are opposed to decency."

— Samuel Byrne, Editor
of
THE
PITTSBURGH OBSERVER —

unforgettable dramas as George Bernard Shaw's "Back To Methuselah," which was so long that the Theatre Guild had to divide it into three parts, playing each part one week and then repeating each part for a second week "Anna Christie" by Eugene O'Neill, "R.U.R." which added the word robot to our language and Luigi Pirandello's "Six Characters in Search of an Author." John Barrymore's "Hamlet" sparked a revival of interest in Shakespearean plays ...

In a poll conducted by the critics and editors of *The Film Daily*, the ten best motion pictures (all silent of course) for the year of 1922 were: *Orphans of the Storm*, *Prisoner of Zenda*, *Nanook of the North*, *Robin Hood*, *Grandma's Boy*, *When Knighthood Was in Flower*, *Smilin' Through*, *Oliver Twist*, *Blood and Sand*, and *Tol'able David*.

Some of the popular songs from musicals were: "Song of Love" from *Blossom Time*, "April Showers," from *Bombo*, "My Man" from *Follies*, "Say It With Music," from *Music Box Review*, and "What'll I do" from the same play.

Probably the greatest sports figures that ever lived played through the year 1922. These names included all-time greats such as Babe Ruth, Red Grange, Lou Gherig, and Jack Dempsey, all of whom were nationally worshiped by youngsters.

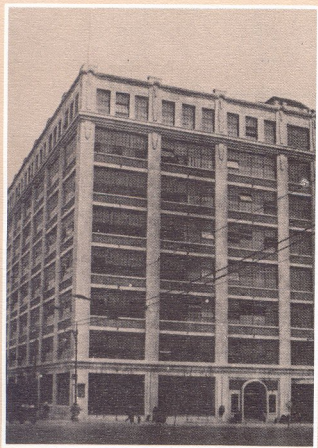

Finally, the year 1922 represented a revolution in the world of fashion. Despite raised eyebrows by "moralists," young girls wore extremely short skirts for dancing and parties, and ankle-length skirts for everyday wear. Knickers and jackets with wide lapels were popular men's styles, with the straw hat as the usual head gear.

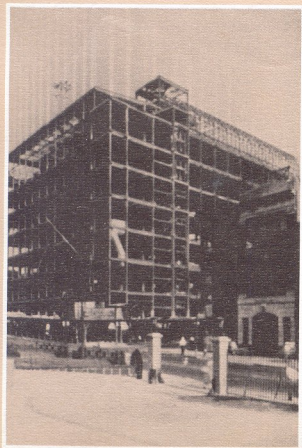

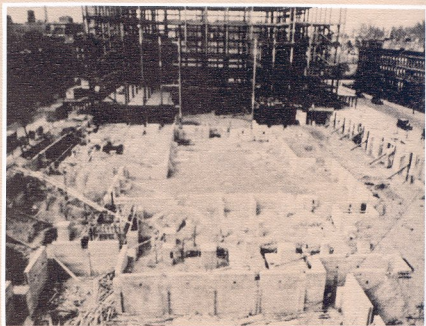

COURTESY: MUSEUM OF THE CITY OF NEW YORK

"From now on," read a notice newly posted on the walls of Henry Ford's automobile factory in Detroit, "it will cost a man his job, without any excuse or appeal being considered, to have the odor of beer, wine or liquor on his breath, or to have any of these intoxicants on his person or in his home. The Eighteenth Amendment is a part of the fundamental laws of this country. It was meant to be enforced. Politics has interfered with enforcement of this law, but so far as our organization is concerned it is going to be enforced to the letter."

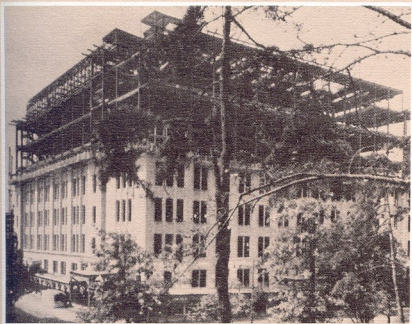

This was a year of glamour, a year of revolutionary change, and a year of progress. This was 1922.

Embassies Going to Paris To Confer on Greek Crisis

GENEVA, Sept. 10 (Associated Press).—Eleutherios Venizelos, former Premier of Greece, who is visiting at St. Moritz with his family, intends to go to Paris, probably on Monday, unless the developments in these months cause him to alter his plans.

He is expected to confer with British and personal friends in the local capital regarding the situation in Athens.

Mr. Venizelos declines to discuss the Greek political situation, but friends in his proposed trip to Paris expect that he is considering the possibility of being called back to power in Greece.

GENEVA, Sept. 10 (Associated Press).—First troops have reached Piraeus from the former Greek front in Asia in a mutinous mood. They looted the streets in the city in small groups in a demonstration against King Constantine, near

Man Lived Twenty-Four Hours After Heart Had Once Stopped

Copyright, 1922, by The New York Times Co.
By Wireless to THE NEW YORK TIMES.

LONDON, Sept. 10.—A patient at St. Bartholomew's Hospital, whose heart had stopped beating, was restored to life Wednesday night and remained alive for more than twenty-four hours.

The man had been operated on for septic tonsillitis, and immediately after the operation his heart action stopped and his breathing ceased. The operating surgeon, in his statement, says:

"We did artificial respirations of the usual kind for five or ten minutes, but there was no response on the part of the heart. I decided to open the abdomen and massage the heart through the diaphragm. After that had been going on for about ten minutes more with no response from the heart, I perforated the diaphragm and massaged the heart in the pericardium. The heart was at first completely lax, but after a time it began to quiver, and after about ten minutes more massaging began to beat normally. The man certainly lived, but he never gave any sign that he had recovered consciousness. The operation took place Wednesday night, and the man died early Friday morning."

RADIO WARNS BIG STEAMERS

Police and Fire Boats and Railroad
Tugs Work for Hours to Re-
capture Drifting Fleet.

Thirty to forty heavily laden coal barges, swept from their moorings at East River piers at ebb tide yesterday by a swift flood of waters from the Hell Gate Channel, swirled down the river in a wild jam, smashing and ripping one another and imperiling scores of large and small boats in the narrow West Channel between Manhattan Island and Blackwell's Island.

The rushing wall of danger started down the river just a few minutes before several large passenger boats were due to stream up, and policemen along the riverfront frantically flushed every steamboat company they could remember to tell them of the uncontrollable fleet of water juggernauts sweeping through the narrow channels.

Many of the big boats were called by radio apparatus to duck their noses quickly against the shore, so that no casualties to passenger craft were reported. Two small yachts cruising up the west channel of the river ran into the tangle of battering boats, but by swift maneuvers managed to turn tail and flee around the southern end of Blackwell's Island, and thence up the river in the east channel.

Narrow Escape for Ferryboat.

Dr. Granger, 72, Drops Dead at

The Rev. Dr. William A. Granger, fourteen years, President of the New York State Baptist Convention of the most prominent Baptists in the State, dropped dead yesterday in the First Church, Mount Vernon, while in front of the communion table, his right hand outstretched to the Rev. Harold Cooke Phillips, pastor of the church.

The church, which is one of the most prominent in Mount Vernon, was crowded with parishioners come to help welcome their new Dr. Granger, who had been past many years previous to his coming with the Baptist State Convention, when selected to welcome Mr. Phillips, who is a graduate of Union Theological Seminary and a native of Jamaica, N. Y.

Dr. Granger, apparently in good health, had walked to the table to the altar and was about to commence the new pastor when he was stricken. Death had been instantaneous.

Dr. Granger was carried to a room, and Mr. Phillips offered prayer after which the congregation, whom were in tears, left the church. Dr. Granger was born at Colton, N. Y.

...bridge, England, and was 72
years old. He came to this country
when 4 years old and first attended Col-
umbia University, after which he gradu-
ated from Union Theological Seminary.
His first pastorate was in Long Island
city, after which he was stationed in
Brooklyn and Oswego, N. Y. Then he
was appointed pastor of the First Baptist
Church of Mount Vernon, where he
remained for fifteen years. Later he
became President of the Baptist State
convention, which position he held for
several years, retiring from that office
in October last.

While head of the Baptist Convention,
Mr. Granger visited every Baptist church
in the State and enjoyed the distinction
of being the only President who had
completed this work.

Mr. Granger had resided for many
years at 157 Glen Avenue, Mount Vernon.
He was a member of Hlawaatha Lodge,
and A. M.; Mount Vernon Chap-
ter, U. M.; Bethel-Home Commandery,
U. S. Templar; Phi Beta Kappa So-
ciety, and was a trustee of Colgate Uni-
versity.

He is survived by his wife and four
children, Arthur L., Leonard R., Edith
Granger and Mrs. F. E. Vaughan,
and by seven grandchildren.
The funeral services will be held at
the First Baptist Church tomorrow
morning.

DR. C. H. MAYO ARRIVES

Physicians Spend the Day in Con-
sultation and Make Labora-
tory Tests.

Special to The New York Times.
WASHINGTON, Sept. 10.—A bulletin
issued at the White House tonight con-
cerning Mrs. Harding's condition was
more hopeful in tone than any issued
in the past two days. A bulletin at noon
repeated the statement in previous bul-
letins that her condition was still crit-
ical, but tonight's official report of her
condition omitted that ominous phrase.

Although the night bulletin did not say so,
it was learned at the White House
that the toxic effects, which have been
one of the chief dangers in Mrs. Hard-
ing's case, has been diminished slightly.
The bulletin said that Mrs. Harding had
a fairly comfortable day with indica-
tions of slight improvement in her
general condition. Altogether a more
optimistic atmosphere prevails at the
White House, although it is apparent
that Mrs. Harding is still in an extremely
dangerous stage of her malady.

The night bulletin contained the first
official admission that a surgical opera-
tion might be necessary. It has been
understood that this would be resorted
to only in a last desperate effort to
save her life. Whether there would be
an operation was dependent, it was said,
on the outcome of laboratory tests made
by Dr. John M. T. Finney of Johns

Plans a Tube One Mile Long To Test the Einstein Theory

Special to The New York Times.

CHICAGO, Sept. 10.—Announce-
ment is made here that Professor
Albert A. Michelson, University of
Chicago physicist, is hopeful of being
able to test at Mount Wilson,
California, the validity of the Ein-
stein theory of relativity by means
of a steel tube, one mile long and
one foot in diameter. Professor
Michelson says that experiments
carried on this summer were almost
successful.

"Atmospheric interference was all
that prevented the complete success
of our work," he said. "Tempera-
ture variations nullified our work."

"It proved to us that our princi-
ple was right and now we plan to
eliminate atmospheric interference
by constructing a steel tube one
foot in diameter around the entire
one-mile course. By means of this a
vacuum all such interference is
eliminated."

CHICAGO, Sept. 10.—Attorney
General Daugherty, refusing to make
concession to criticism of the tempo-
rary injunction he obtained against
striking railway shopmen ten
days ago, will personally appear to-
morrow before Judge James H. Wilkeson
of the Federal Court here, determined
stick to his guns in a fight to have
drastic restraining order made per-
manent.

This unqualified forecast was
tonight by one closely in touch with
Government's plan of campaign to
a curb on railway strike activities.

The prediction came in direct re-
sponse of press dispatches from Wash-
ton last week reporting that the
Attorney General had intimated he
would recommend that provisions of the
injunction, interpreted as placing a
curb on free speech, free press and free
assembly, be toned down, if not
deleted.

In support of the Attorney Gen-
eral's plea, reports indicated, the Govern-
ment will introduce a mass of docu-
ments and other evidence of an alleged
campaign of terrorism instituted by

U.S.-Soviet Plan Is Said to
Provide New Hot Line
Link Via Satellite

RESULT OF ARMS TALKS

Consultation Would Precede
Retaliation—Signing Is
Expected This Year

By TAD SZULC

Special to The New York Times

WASHINGTON, Sept. 12 — The United States and the Soviet Union were understood today to have agreed on a system to handle nuclear accidents together, supported by a new communications satellite hot line to insure instantaneous consultations.

This accord—the first tangible if modest result of nearly two years of secret negotiations on the limitation of strategic arms—was reached in Helsinki late in August, according to authoritative diplomats here.

Official spokesmen for the State Department and the Arms Control and Disarmament Agency declined to comment on reports of the agreement in line with the policy adopted by the United States and the Soviet Union against public discussion of subjects related to the talks on arms limitation.

Signing Expected This Year

The United States is known, however, to have established the practice, since the negotiations began on Nov. 17, 1969, of keeping its Atlantic Alliance partners informed of developments in its strategic dealings

Trading Partners of U.S. Hurt by Import Surcharge

Survey Finds Nixon Economic Program,
Including Decision to Float Dollar,
Stirring Resentment Abroad

By BRENDAN JONES

Most of the United States' trade. The countries covered main trading partners have accounted for more than 75 per cent of the \$40-billion of United States imports in 1970.

The survey showed that, slightly less than a month after the Administration's surcharge and monetary actions, most countries have not yet been able to calculate the full effects of the measures on their trade.

It was evident in the survey, however, that the surcharge particularly—as designed and expected—is having upsetting worldwide repercussions.

Surcharge Assessed

In a number of countries—Canada, Mexico, Italy, Japan and West Germany—it was found that the main adverse effects of the surcharge are being felt by small and medium-sized industries.

These are mainly concerns producing sundry goods—footwear and light manufactures—or specialized products such as optical or surgical instruments.

One West German executive of a small surgical instrument manufacturer said that the American surcharge, together with the higher floating value of the mark, "will strangle us to death."

A Brazilian official remarked that "it is now a case of push

The surcharge, combined with the decision to let the dollar float downward in exchange markets while other currencies are pressured upward, has also caused considerable resentment abroad at what is regarded as a one-sided American action.

Although in some countries, notably West Germany, there is a feeling that the surcharge may not be as damaging as first feared, in many there is worry that its effects could severely check business and perhaps contribute to recession.

Trade War Feared

There is fear, too, that the American surcharge and general currency-value uncertainties could be the spark that might set off cut-throat competition among nations grimly determined to maintain trade in any and all markets, especially the United States.

These are some of the highlights of a 15-country survey just completed by New York Times correspondents on the effects of the American economic policies on international

Hold Out for a Full Amnesty
From Prosecution and for
Superintendent's Ouster

GOVERNOR STANDS ASIDE

He Rejects Citizens' Plea to
Join Talks and Rules Out
Immunity for Convicts

By FRED FERRETTI

Special to The New York Times

ATTICA, N. Y., Monday, Sept. 13—Rebellious inmates who last Thursday seized the Attica Correctional Facility yesterday won 28 concessions they had demanded from the state, but they were stubbornly holding out for complete amnesty from criminal prosecution and the ouster of the prison superintendent, Vincent R. Mancusi.

Both of these demands have been flatly rejected by the state, and Governor Rockefeller said that criminal amnesty was beyond his constitutional authority.

The rejection of the amnesty demand came a day after the death of a guard, William Quinn, who was reported to have been injured by prisoners during the take-over. He was one of 12 guards hospitalized from injuries suffered during the rioting at the maximum-security prison.

Rockefeller Stands Pat

Another persistent prisoner demand and one that was echoed yesterday by the citizens rallied in its observance—that the Governor personally join in the negotiations—was turned down by Mr. Rockefeller.

The New York Times/William E. Squire

DIED IN ATTICA: Flag outside the disrupted prison flew at half-staff yesterday following a prison guard who was injured on Thursday, the first day of rioting by inmates.

City's Schools Open Today Under Pinch of Budget Cut

By LEONARD BUDER

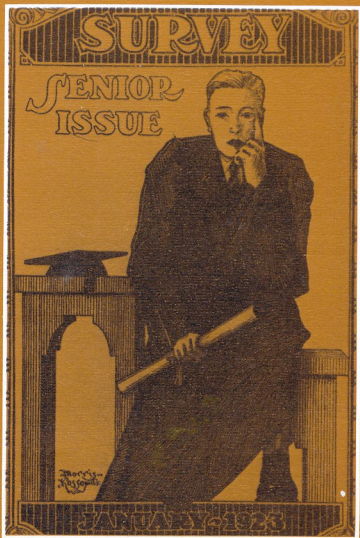

The city's public schools will start the new academic year this morning with more pupils but fewer teachers than last fall and beset by many major problems and uncertainties.

A total enrollment of 1,166,709 pupils is expected, 23,005 above the record set last fall. But only 56,000 teachers—5,000

sters who formerly received reduced fare public transit privileges, made possible by school subsidies, will now have to pay full fare or walk to and from school.

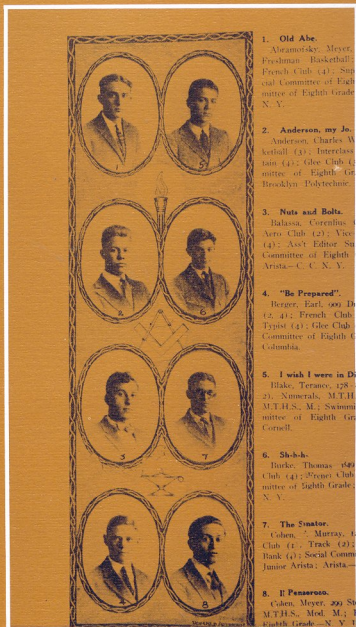

However, school officials say that every class will be covered by a teacher.

But thousands of substitute

Tech's traditions renew themselves in the persons of alumni who become faculty members. Among those preeminent is Mr. Herbert Rosand, acting chairman of the Art Department. As his yearbook picture shows, he was in Tech's first graduating class (1923). Other Tech Graduates on the Faculty:

 Alan Melnick — June-1965

SEPTEMBER 11, 1922

It was cloudy, about seventy, and raining. The day was September eleventh, and Brooklyn Tech, located in the loft building at Flatbush Avenue Extension and Concord Street, opened its doors for the first time to twenty-four hundred students.

That day, in Manhattan, a mysterious lady left a full assortment of clothes on a corner. The TIMES had an article about the barge mishaps on the East River.

The good news was that Mrs. Harding showed signs of a recovery, so the doctors might not have to operate. News came that the dye embargo was back in the Tariff Bill after pressure by the combined Farm and Sugar bloc to arrest high agricultural rates. Professor Michelson, a physicist at the University of Chicago, announced plans to test Einstein's theory of relativity with the use of a mile-long steel tube.

From Russia came speculation that Lenin might reappear on November 7 to celebrate the fifth anniversary of the Revolution. Greek soldiers returned from the Front in Asia in a mutinous mood. Landing in Piraeus; they shouted insults against Constantine and cheered for Venizelos, after defeat by Turkey over disputed Smyrna. The Irish Postal Service stopped when the Union defied the government, and workers struck against proposed wage reductions.

Two men were rescued from Long Island Sound after their boat had sunk and they had floated on an icebox. A lady was saved after being run over by a trolley in Coney Island, and a wedding was broken up because of plaster falling from the ceiling of a church and injuring the bride's parents.

Babe Ruth broke his batting slump by blasting 2 homeruns and 2 doubles at Yankee Stadium, and that night the Yankees boarded a train for their last road trip of the 1922 season. George Sisler won the batting crown as he hit a startling .422 for the season.

That was how the first day of school in 1922 proceeded.

Fifty years later Brooklyn Tech would open its doors at twenty-nine Fort Greene Place on September thirteenth. It was cloudy, about seventy, and raining.

SEPTEMBER 13, 1971

In the news that day the Soviet Union announced, "with sorrow", the death of Krushchev. No public ceremony was held. At the Astronomical Observatory in the U.S.S.R., an international conference was held with specialists in many fields of science considering the possibility of communication with intelligent life on other worlds. On Earth, after two years of negotiations, accord was reached between the U.S. and the U.S.S.R. to prevent war by atomic error. The plan called for cutting calling time by using a new Hot Line link via satellite.

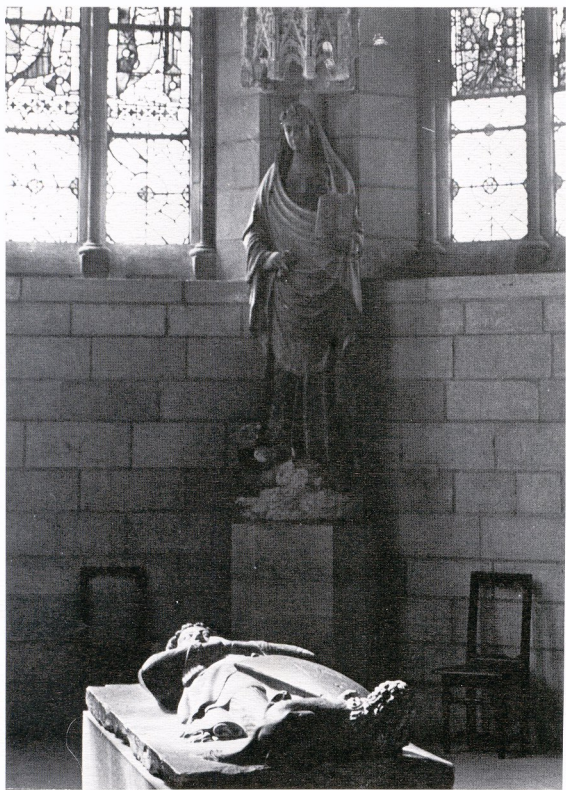

A survey found Nixon's Economic Program stirring resentment abroad. The ten percent surcharge combined with the floating dollar caused cut-throat competition among nations determined to maintain trade with the U.S. Nine units of the U.S. Army stationed outside of South East Asia were reported to be incapable of waging war. Problems included: lack of manpower, training short comings, racial unrest, drug abuse, and the unpopularity of the draft and the war.

The prisoners of Attica Correctional Facility won twenty-eight of their demands, but held out for complete amnesty. In New York City there were twenty-three thousand more students and fifty-six hundred fewer teachers. The Board of Education maintained that all classes would be covered by a teacher.

Here are two days, fifty years apart, and yet very much alike. They were days of economic coercion, scientific importance, military upheaval, and social concern.

Loans for Learning

**If you need a low-cost student loan for college,
trade or nursing school, preparatory school or
graduate studies see the Lincoln first.**

1. For the student whose family's *net* taxable income is under \$15,000, Lincoln will lend up to \$7,500. No interest accrues as long as you are in school, and then you may have up to 10 years to repay.
2. Families whose *net* taxable income is over \$15,000 may borrow up to \$20,000—as much as \$5,000 in any school year.

Write for full details or call:
In New York—(212) 782-6000
In Nassau—(516) 931-4300
